Why is First Aid in the Workplace Important?

PRACTICAL GUIDE

IT'S THE LAW

WORK HEALTH & SAFETY ACT

A person conducting a business or undertaking has the primary duty under the WHS Act to ensure, so far as is reasonably practicable, that workers and other persons are not exposed to health and safety risks arising from the business or undertaking.

Document: Work Health and Safety Act 2011

WORK HEALTH & SAFETY REGULATION

A person conducting a business or undertaking at a workplace must ensure:

- a. The provision of first aid equipment for the workplace,
- b. That each worker at the workplace has access to the equipment, and
- c. Access to facilities for the administration of first aid

Document: Health and Safety Regulation 2011

FIRST AID IN THE WORKPLACE CODE OF PRACTICE

An approved code of practice is a practical guide to achieving the standards of health, safety and welfare required under the WHS Act and the Work Health and Safety Regulations (the WHS Regulations).

A code of practice applies to anyone who has a duty of care in the circumstances described in the code. In most cases, following an approved code of practice would achieve compliance with the health and safety duties in the WHS Act, in relation to the subject matter of the code. Like regulations, codes of practice deal with particular issues and do not cover all hazards or risks that may arise. The health and safety duties require duty holders to consider all risks associated with work, not only those for which regulations and codes of practice exist.

Document: Safe Work Australia, First Aid in the Workplace Code of Practice, March 2015

If a relevant Act or Regulation exists, you must follow the requirements stated in the documents. Penalties may apply if workplaces are found not following the WHS ACT or Regulation.

FIRST AID KIT Reference Guide

Trafalgar's range of First Aid Kits are designed to assist with a self assessed workplace risk assessment. Includes content recommended in Safe Work Australia, First Aid in the Workplace Code of Practice*.

Kit	Case Type	Material	Recommended for	Ideal for	Suitable for

First Aid Kit Guide

High Risk Workplace

Example	<ul style="list-style-type: none"> Construction Warehousing Manufacturing Laboratories 	<p>DEFINITION: A workplace where workers are exposed to hazards</p> <p>RECOMMENDATION: 1 first aid kit should be provided on site for at least every 25 people</p>
----------------	--	--

Low Risk Workplace

Example	<ul style="list-style-type: none"> Office Buildings Home Offices Retail Shop Cars Trucks 	<p>DEFINITION: A workplace where workers are not exposed to hazards</p> <p>RECOMMENDATION: 1 first aid kit should be provided on site for at least every 50 people</p>
----------------	---	--

*The information above is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

For list of potential hazards go to:
work.trafalgar.com.au/whats-new/first-aid-in-workplace

Did You Know?

Delivery vehicles and company cars also constitute a workplace and require appropriate first aid to be on board.

A portable first aid kit should be provided in the vehicles of mobile workers if that is their workplace (for example, couriers, taxi drivers, sales representatives, bus drivers and inspectors). For safety reasons the first aid kit should always be securely stored in the vehicle.

Vehicles transporting Dangerous Goods (specifically Placard class, 2.3, 3, 4, 5.1 (Solids), 5.1 (Liquids), 5.2, 6.1, 8, 9) must have an eyewash kit at least 250ml capacity, filled and ready for use at all times. See our HV1 first aid kit.

PV1

Passenger Vehicle FIRST AID KIT

- ▶ Compact and portable
- ▶ Easily fits into the glove box or boot of the car
- ▶ Soft durable case with compartments
- ▶ Case dimensions: 140 x 210 x 60mm (W x H x D)

Portable First Aid Kits

Did You Know?

Australian workplaces are required to have appropriate first aid equipment available and accessible for all employees. A workplace is most commonly identified as an office, warehouse, manufacturing facility or a construction site. Trucks, delivery vehicles and company cars also constitute a workplace and require appropriate first aid to be on board.

FIRST AID SITE ASSESSMENT

A periodic assessment schedule of your workplace first aid equipment will allow you to identify hazards and determine typical injuries or illness that may require rapid treatment. The assessment should also consider number of employees and work area design, as first aid should be easily accessible and available within minutes of the injury location.

LOCATION

First aid kits should be kept in a prominent, accessible location and able to be retrieved promptly.

First aid kits should be located close to areas where there is a higher risk of injury or illness.

WP1

Workplace FIRST AID KIT – Portable

Includes content recommended in Safe Work Australia, First Aid in the Workplace Code of Practice.

Did You Know?

As business operations are constantly changing to meet customer demands your workplace first aid requirements may also require adjustments.

HIGH RISK WORKPLACE

A High Risk Workplace describes an environment where workers are exposed to hazards that could result in serious injury or illness and would require first aid. Some examples include:

- Use of hazardous machinery or substances onsite
- Extreme heat or cold working conditions
- Risk of falls
- Hazardous forms of work

LOW RISK WORKPLACE

A Low Risk Workplace describes an environment where workers are not exposed to hazards that could result in serious injury or illness. Offices, shops or libraries are common examples and potential work-related injuries and illnesses requiring first aid would be minor in nature.

LOCATION

First aid kits should be kept in a prominent, accessible location and be able to be retrieved promptly. They should be located close to areas where there is a higher risk of injury or illness.

Workplace FIRST AID KIT – Wall Mount

Includes content recommended in Safe Work Australia, First Aid in the Workplace Code of Practice.

METAL CASE

- ▶ Sturdy metal construction
- ▶ Internal shelving for a quick response to first aid
- ▶ Case dimensions: 240 x 385 x 115mm (W x H x D)

CODE 876478

PLASTIC CASE

- ▶ ABS plastic construction
- ▶ Case includes an 'o' ring to help resist dust and water
- ▶ Features shelving and compartments for easy storage
- ▶ Case dimensions: 300 x 390 x 150mm (W x H x D)

Did You Know?

A person in the workplace should be nominated to maintain the first aid kit (usually a first aider) and should ensure: The kit is fully stocked, monitored and any items used are replaced as soon as practicable after use.

RESTOCKING AND MAINTAINING KITS

The first aid kit is checked after each use or at least once every 12 months. All items are in good working order, have not deteriorated or have expired as well as the sterile products are sealed and have not been tampered with.
